

PRESS RELEASE

Certified Aviation Services ranks 12th on INC 500 Top 100 Transportation Companies List

Ontario, California August 2008 – Certified Aviation Services is excited to announce their inclusion in the INC 5000 list, celebrating and recognizing the country's top 5000 fastest-growing, private companies. CAS was ranked in the top 25% at 1,014th on the list and ranked 12th of the top 100 Transportation Companies.

The list is managed and published by INC.com, a resource both online and in print for entrepreneurs and small business owners. Qualifications to make the list include the company must be U.S.-based, privately held and independent as of December 31, 2006. Revenue in 2003 must have been at least \$200,000 and revenue in 2006 must have been at least \$2 million. The rank is determined according to the percentage of revenue growth from 2003 to 2006.

Certified Aviation Services continued expansion from 2003 through 2006 resulted in almost 400% revenue growth. The company expanded from providing aviation maintenance services in 5 US Airports to over 16 locations in 2006. Providing diversity in aviation maintenance service offerings also helped fuel the growth; CAS is proud to have grown the commercial line maintenance business as well as private and military aviation heavy maintenance and modification revenue streams.

“By listening to our customers and customizing our services to meet their needs, our team is able to focus on improving their performance both from a financial and operational perspective. Our creative partnerships with customers are the key to our continued growth.”

-Alex Vorobieff, President
