

PRESS RELEASE

CAS Receives FAA AMT Diamond Award of Excellence

Ontario, CA February 6, 2017 -- CAS Components was awarded the 2016 Federal Aviation Administration (FAA) AMT Diamond Award of Excellence. The Diamond Award of Excellence is the industry's highest honor for aircraft maintenance. To qualify for the award, 100 percent of an organization's eligible maintenance technicians must complete specialized, continuous training in aircraft systems, regulations and FAA rules over a 12-month period. This prestigious award is designed to encourage corporations and

their employees to take advantage of training opportunities, through both initial and recurrent training.

“While the award is only available once a year, CAS and its customers reap the benefit of this rigorous training daily. Advanced training has become part of our DNA at CAS, whether it’s technical training for our mechanics, IA training for our Inspectors, or Excel training for our Customer Service folks. Once it becomes part of your routine, you really begin to see the benefits to the operation”, says Brad Caban CAS President.
